

	Product Specification	Date: 10.06.2010 Version: 2 Prepared by: CEO
	Warm Water Prawns (tail on) in brine with sweetener	

Product: Warm water prawns (tail on) in brine
Ingredients: Warm water prawns (*Penaeus vannamei*), Brine consisting of: Water, salt, acidifiers (E330, E334, E331), preservatives (E211, E202), stabiliser (E466), sweetener (E954).

Storage:
Max. 5°C
BBE: 6 weeks from day of production
Once opened keep prawns covered in brine and use within 7 days of opening.

Quality:	Target:	Method:	Nutritional:	
			Content per 100 g	
Size	Var./lb	Counting. Number of prawns per 454 g	Energy KJ	290
Salt	2.5% ± 0.2	Analysis: Amount of sodium chloride in prawns	Energy Kcal	69
pH	5.5 ± 0.3	Analysis: pH in brine	Protein	16
			Carbohydrate	0
			Fat	0-1
			Salt	2.5

Microbiology (results during first week after production):

Bacteria	Target	Accepted	Method
TVC	5,000	25,000	NMKL 96
Enterococcus	<100	<100	NMKL 68
Staph. Aureus	<100	<100	NMKL 66
Coliform thermo	<10	<10	NMKL 125
Enterobacteriaceae	<100	<100	NMKL 144
Lactobacillus	<100	<100	NMKL 140
Pseudomonas	<100	<100	Kings Agar

GMO status:
Contains no components (ingredients, additives, etc.) made from genetically modified material

Allergen status:
Contains shellfish

Metal detection:	Fe:	Non-Fe:	SS:
	2.5 mm	4.0 mm	5.0 mm

Packaging material:	Labelling:
Tubs: clear plastic (PP), snap on lid	Aut. no. DK 4135 EC
Tray: polystyrene (PS)	Ingredients, use by date, weight, storage information
Shrink wrap: clear	(other information as agreed)
