

	<b>Product Specification</b>	Date: 10.06.2010 Version: 2 Prepared by: CEO
	<b>Warm Water Prawns in brine with sweetener</b>	

**Product:** Warm water prawns in brine  
**Ingredients:** Warm water prawns (*Penaeus vannamei*), Brine consisting of: Water, salt, acidifiers (E330, E334, E331), preservatives (E211, E202), stabiliser (E466), sweetener (E954).

**Storage:**  
 Max. 5°C  
 BBE: 6 weeks from day of production  
 Once opened keep prawns covered in brine and use within 7 days of opening.

Quality:	Target:	Method:	Nutritional:	
			Content per 100 g	
Size	Var./lb	Counting	Energy KJ	290
Salt	2.5% ± 0.2	Analysis: Amount of sodium chloride in prawns	Energy Kcal	69
pH	5.5 ± 0.3	Analysis: pH in brine	Protein	16
			Carbohydrate	0
			Fat	0-1
			Salt	2.5

**Microbiology (results during first week after production):**

Bacteria	Target	Accepted	Method
TVC	5,000	25,000	NMKL 96
Enterococcus	<100	<100	NMKL 68
Staph. Aureus	<100	<100	NMKL 66
Thermo coliform	<10	<10	NMKL 125
Enterobacteriaceae	<10	<10	NMKL 144
Lactobacillus	<100	<100	NMKL 140
Pseudomonas	<100	<100	Kings agar

**GMO status:**  
 Contains no components (ingredients, additives, etc.) made from genetically modified material

**Allergen status:**  
 Contains shellfish

Metal detection:	Fe:	Non-Fe:	SS:
	2.5 mm	4.0 mm	5.0 mm

Packaging material:	Labelling:
<b>Tubs:</b> white, clear plastic (PP), snap on lid	Aut no. DK 4135 EC
<b>Tray:</b> cardboard, polystyrene (PS)	Ingredients, use by date, weight, storage information
<b>Shrink wrap:</b> clear	(other information as agreed)
